

CASE STUDY

Project Name:
AEON Mall
Ho Chi Minh City, Vietnam

Installer / Applicator:
Intechem Co Ltd

Featured Products:
ARDEX WPM 160
ARDEX WPM 185

SITUATION:

A well-known chain of shopping malls in Vietnam required waterproofing for deck roof with an A.P.P (atactic polypropylene) membrane.

CHALLENGES:

The project required an A.P.P membrane with high quality and the installation had to be completed after 2 weeks.

SOLUTION:

ARDEX WPM 160 Polyester reinforced APP Bitumen Membrane & ARDEX WPM 185 Mineral coated APP membrane. When torching APP membranes, the bitumen begins to flow like candle wax when it reaches temperatures above 300°F. The molten bitumen then behaves like hot mopping asphalt and will flow. That makes the job quick, smooth and fast.
